Summary _____

In my research, I study chemical evolution across cosmic time as well as the first stars and galaxies. Primarily, I use the largest optical telescopes in the world to study some of the least chemically evolved gas 2 billion years after the Big Bang. The gas clouds are encoded with information about their star formation history and can, in combination with a chemical enrichment model that I have developed, reveal the mass distribution of ancient stellar populations. This information is invaluable because the properties of the first stellar populations are still shrouded in mystery. This work is possible through a process known as quasar absorption line spectroscopy – where gas between a bright background galaxy and our telescope can be seen, and subsequently studied, in absorption.

Employment _____

University of Milano Bicocca

Milan, Italy

POSTDOCTORAL RESEARCHER Sep. 2021 - PRESENT

Education _____

Centre for Extragalactic Astronomy, Durham University

Durham, UK

PHD IN ASTROPHYSICS Oct. 2017 - Sep. 2021

- Thesis: 'A window to the first stars: An investigation of chemically near-pristine environments'
- Advisors: Prof. Ryan Cooke and Prof. Michele Fumagalli

Lancaster University

Lancaster, UK

MASTER OF PHYSICS (MPHYS): 1st Class (Hons)

Oct. 2012 - Jul. 2016

Durham University

- Thesis: 'Investigating cold dark matter candidates'
- Advisor: Dr. John McDonald

Awards and Fellowships ______

2021	The interior and i in a standard of outstanding over all performance by a postgraduate stadent.	Dairiain Oniversity
2019	Associate Fellow of the Higher Education Academy, through the Durham Excellence in Learning and	
2019	Teaching Awards scheme.	
2019	Martin and Beate Block Award, Awarded to a promising researcher at the Aspen winter meeting 'Into the	Aspen Centre for
	Starlight'.	Physics

Keith Nicholas Prize. Awarded for outstanding overall performance by a postgraduate student.

2016 **Azzedine Hammiche Prize**, Awarded for exceptional fourth year project work. *Lancaster University*

Talks (4 invited, 25 total)

Most recent:

2021

Oct. 2022 INAF Trieste , Using ESPRESSO and the most metal-poor DLAs to probe the first stars (invited)	Italy
Sep. 2022 ESO Santiago , Using ESPRESSO and the most metal-poor DLAs to probe the first stars	Chile
Sep. 2022 WMAG 2022, Tracing chemical evolution and the first stars with the most metal-poor DLAs	Italy
Jun. 2022 FSTG II , Tracing the first stars with [O/Fe]	Sweden
Jan. 2022 NOAO FLASH, Oxygen-enhanced EMP DLAs as probes of the first stars (invited)	Virtual

Proposal History as Principle Investigator_

2023	Keck I/HIRES, 1 night, 2023A.	NOIRLab
2022	VLT/UVES, 10 hours, P110.	ESO
2022	VLT/ESPRESSO 1-UT, 7 hours, P109.	ESO
2022	VLT/ESPRESSO 4-UT, 1/2 night, P109.	ESO
2021	VLT/UVES, 18 hours, P108.	ESO
2021	Keck I/HIRES, 1 night, 2021B.	NOIRLab
2020	VLT/ESPRESSO 1-UT, 9 hours, P105.	ESO
2020	VLT/UVES, 20 hours, P105.	ESO
2019	WHT/ISIS , 7 nights, 2019B.	ING

Teaching _____

2022 -	Demonstrator , Laboratory of Data Acquisition (postgraduate course)	Milano-Bicocca U.
2021	Advisor, Nuffield Research Placement	Durham University
2019 - 202	1 Demonstrator , Level 2: Stars and Galaxies	Durham University
2018 - 2020	O Demonstrator , Level 1: Further Mathematics for Geoscientists	Durham University
2018 - 2019	9 Demonstrator , Level 1: Maths toolkit for Scientists	Durham University

Memberships and activities _____

- 2022 **WMAG 2022**, Organising committee member for the 'What Matters around Galaxies 2022' conference.
- 2021 **WEAVE**, Member of the WEAVE-QSO survey.
- 2021 **Peer reviewer**, Astrophysical Journal.
- 2021 **Astrocoffee**, Organiser of weekly astrocoffee seminars at Milano-Bicocca.
- 2021 **INAF**, Associate member of INAF Osservatorio Astronomico di Brera.
- 2020 2021 **OCW social**, Member of committee responsible for organising department social events.
 - 2020 **DEX XVI**, LOC member for the '2020 Vision: progress and tensions in astronomy' workshop.
 - **Small Galaxies, Cosmic Questions**, LOC member for the 'Small Galaxies, Cosmic Questions' conference.
- 2018 2019 Journal Club, Convener of a weekly meeting of postgraduate students at Durham University.

Outreach_

Planetarium North East, UK

 Show Provider
 Oct. 2018 - Sep. 2020

Delivered shows on the constellations and planets at events (including multiple science festivals) and local schools using an inflatable planetarium.

Computing Skills _____

Programming Python, git, high-performance computing, batch systems, RStudio.

Publications _____

- R. Cooke et al. (2022) "Primordial helium-3 redux: The helium isotope ratio of the Orion nebula", ApJ, 932, 60
- L. Welsh, R. Cooke, M. Fumagalli, & M. Pettini (2022) "Oxygen-enhanced EMP DLAs: A signpost of the first stars?", ApJ, 929, 158
